

## Summary of Call with NRC Environmental Review Branch

Thursday, July 16, 2020

NRC Attendees	EPA Attendees
Diana Diaz-Toro, Environmental Review Branch Lorrain Baer, NRC Office of General Counsel Maxine Segarnick, NRC Office of General Counsel Robert Carperter, NRC Office of General Counsel	Mike Boydston Douglas Minter Valois Robinson

We talked through EPA's three Options for NHPA compliance, including adopting the Programmatic Agreement and adopting the PA with an EPA Addendum. EPA talking points for this call are attached to provide more detail on what we planned to cover. Not all of the details under *Potential areas for further measures* were shared with NRC.

We asked NRC if they were aware of the specifics for the process of "adopting" the NRC Programmatic Agreement and EPA's role during the implementation of the PA activities.

NRC did not have answers to these questions. We decided the next step was to schedule a call with the Advisory Council on Historic Preservation. NRC let EPA know their ACHP contacts were John Eddins and Sarah Stokely. EPA invited NRC staff to listen in on the call so they could receive the information firsthand. NRC replied that would like to participate in that call.

We asked NRC if they had any information about the Commission's schedule for issuing a final agency decision on the intervenors' appeals of the Atomic Safety and Licensing Board December 2019 decision. They didn't have any more information than we did.

Valois sent an email to John Eddins requesting a call for the following week.
